

About Me

I'm currently developing a RETRO 'multi-game' desktop application in Python (Pyside 6) to show the results of my training and my motivation.
The next step is to collect enough game data to be able to present an analysis of it via power BI.

[CLICK TO DOWNLOAD](#)

Important note: Tests are still in progress, so there may still be bugs.
As we don't have a certificate, you'll have to bypass the smart screen to use the application.
